MF Induction Furnace Type LFS

MF Induction Furnace

Type LFS

Available systems

- meets requirements for melting ferrous and non-ferrous alloys
- 10.000 40.000 kg capacity (related to cast iron)
- Power supplies between 750–8.000 kW available

Enhanced safety

- Approved ground-fault detection system
- Automatic test of bath-grounding
- Automatic reactivation of detection system after manual deactivation
- Automatic self-test
- Furnace coil designed as headgeho-coil

Furnace Design

- Open design for easy maintenance
- Magnetic yokes
- Separate furnace head for easy exchange
- Segmental technology
- Optimized fume-extraction with ABP ECOTOP®-hoods

Coil Design

- Long lifetime, based on rectangular copper profile
- Segmental technology allows "breathing" of the coil
- Low energy consumption
- Headgehog coil for higher safety

2 | Type LFS | Type LFS

Meltprocessor PRODAPT® - Advanced

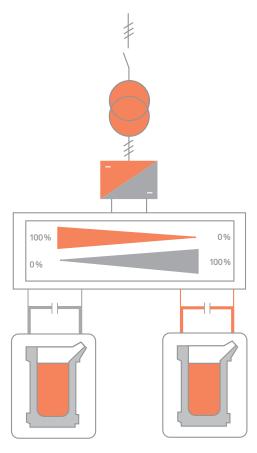

- PLC-based
- Calculation of energy request according to the furnace content
- Control of energy supply for melting and holding operation, as well as for cold-start and sintering
- Monitoring and visualization of operation data and conditions
- System monitoring and alarm function
- Reporting function

The second state of the se

Meltprocessor PRODAPT®

2 furnaces, 1 converter – TWIN-POWER® principle

- Converter power freely distributable between both furnaces
- Refractory of a furnace can be sintered, while melting operation of the other
- Simultaneously holding of melt in one furnace, while melting in the other
- Improved usage of the converter
- Lower maintenance costs
- Lower investment costs compared to separated power supplied

TWIN-POWER® principle

Type LFS

ABP

Holding

Channel Induction Furnace Type LFR and IRT

Available systems

Type LFR

- 13 40 t capacity for smaller volumes
- Inductor power rating between 500 1.000 kW available

Inductor design

- Water-cooled
- Various channel models for optimized operation and long refractory lifetime
- Automatic trend monitoring of the inductor condition

Type IRT

- 60 155 t capacity for bigger volumes
- Inductor power rating between 700 3.000 kW available

Vessel design

- Simultaneous filling and tapping
- Compact, cylindrical-shaped vessel (LFR) for smaller volumes
- Spherical-shaped vessel (IRT)
- Deslagging door at the back
- Tiltable in two directions
- Minimized heat losses

ABP

Furnace processor PRODAPT®-H/P

- Calculation of energy request according to the furnace content
- Control of energy supply for holding operation, as well as for cold-start and sintering
- Monitoring and visualization of operation data and conditions
- Monitoring of inductor key figures and evaluation in inductor diagram
- System monitoring and alarm function
- Reporting function

Efficient power supply with modern IGBT technology

- Compact design based on modular structure
- High efficiency
- No de-ionized water necessary
- Improved availability through short service times during a breakdown
- Power factor cos φ > 0,95

Advantages at a glance

- High reliability and availability
- Low energy consumption
- High operational safety
- Maintenance friendly design
- Functional design
- Simultaneous filling and tapping
- High refractory lifetime
