

FAI-FTC
Special steel foundries

**EXPERIENCE, QUALITY
AND SERVICE IN THE
STEEL INDUSTRY.**

COMPANY

Since 1977, FAI-FTC has been producing castings in special steel and super alloys resistant to heat and corrosion.

We provide tailor-made products, based on the customer's technical and project specifications.

The application of scientific principles, of engineering combined with the most advanced tools, and a long-standing manufacturing expertise ensure the efficient and effective production of castings.

SPECIAL STEEL FOUNDRIES

With two production sites, a static casting foundry in green sand and a centrifuged cone and tube foundry, we offer a wide range of products for the iron and steel industry and the heat treatment of steels and non-ferrous alloys.

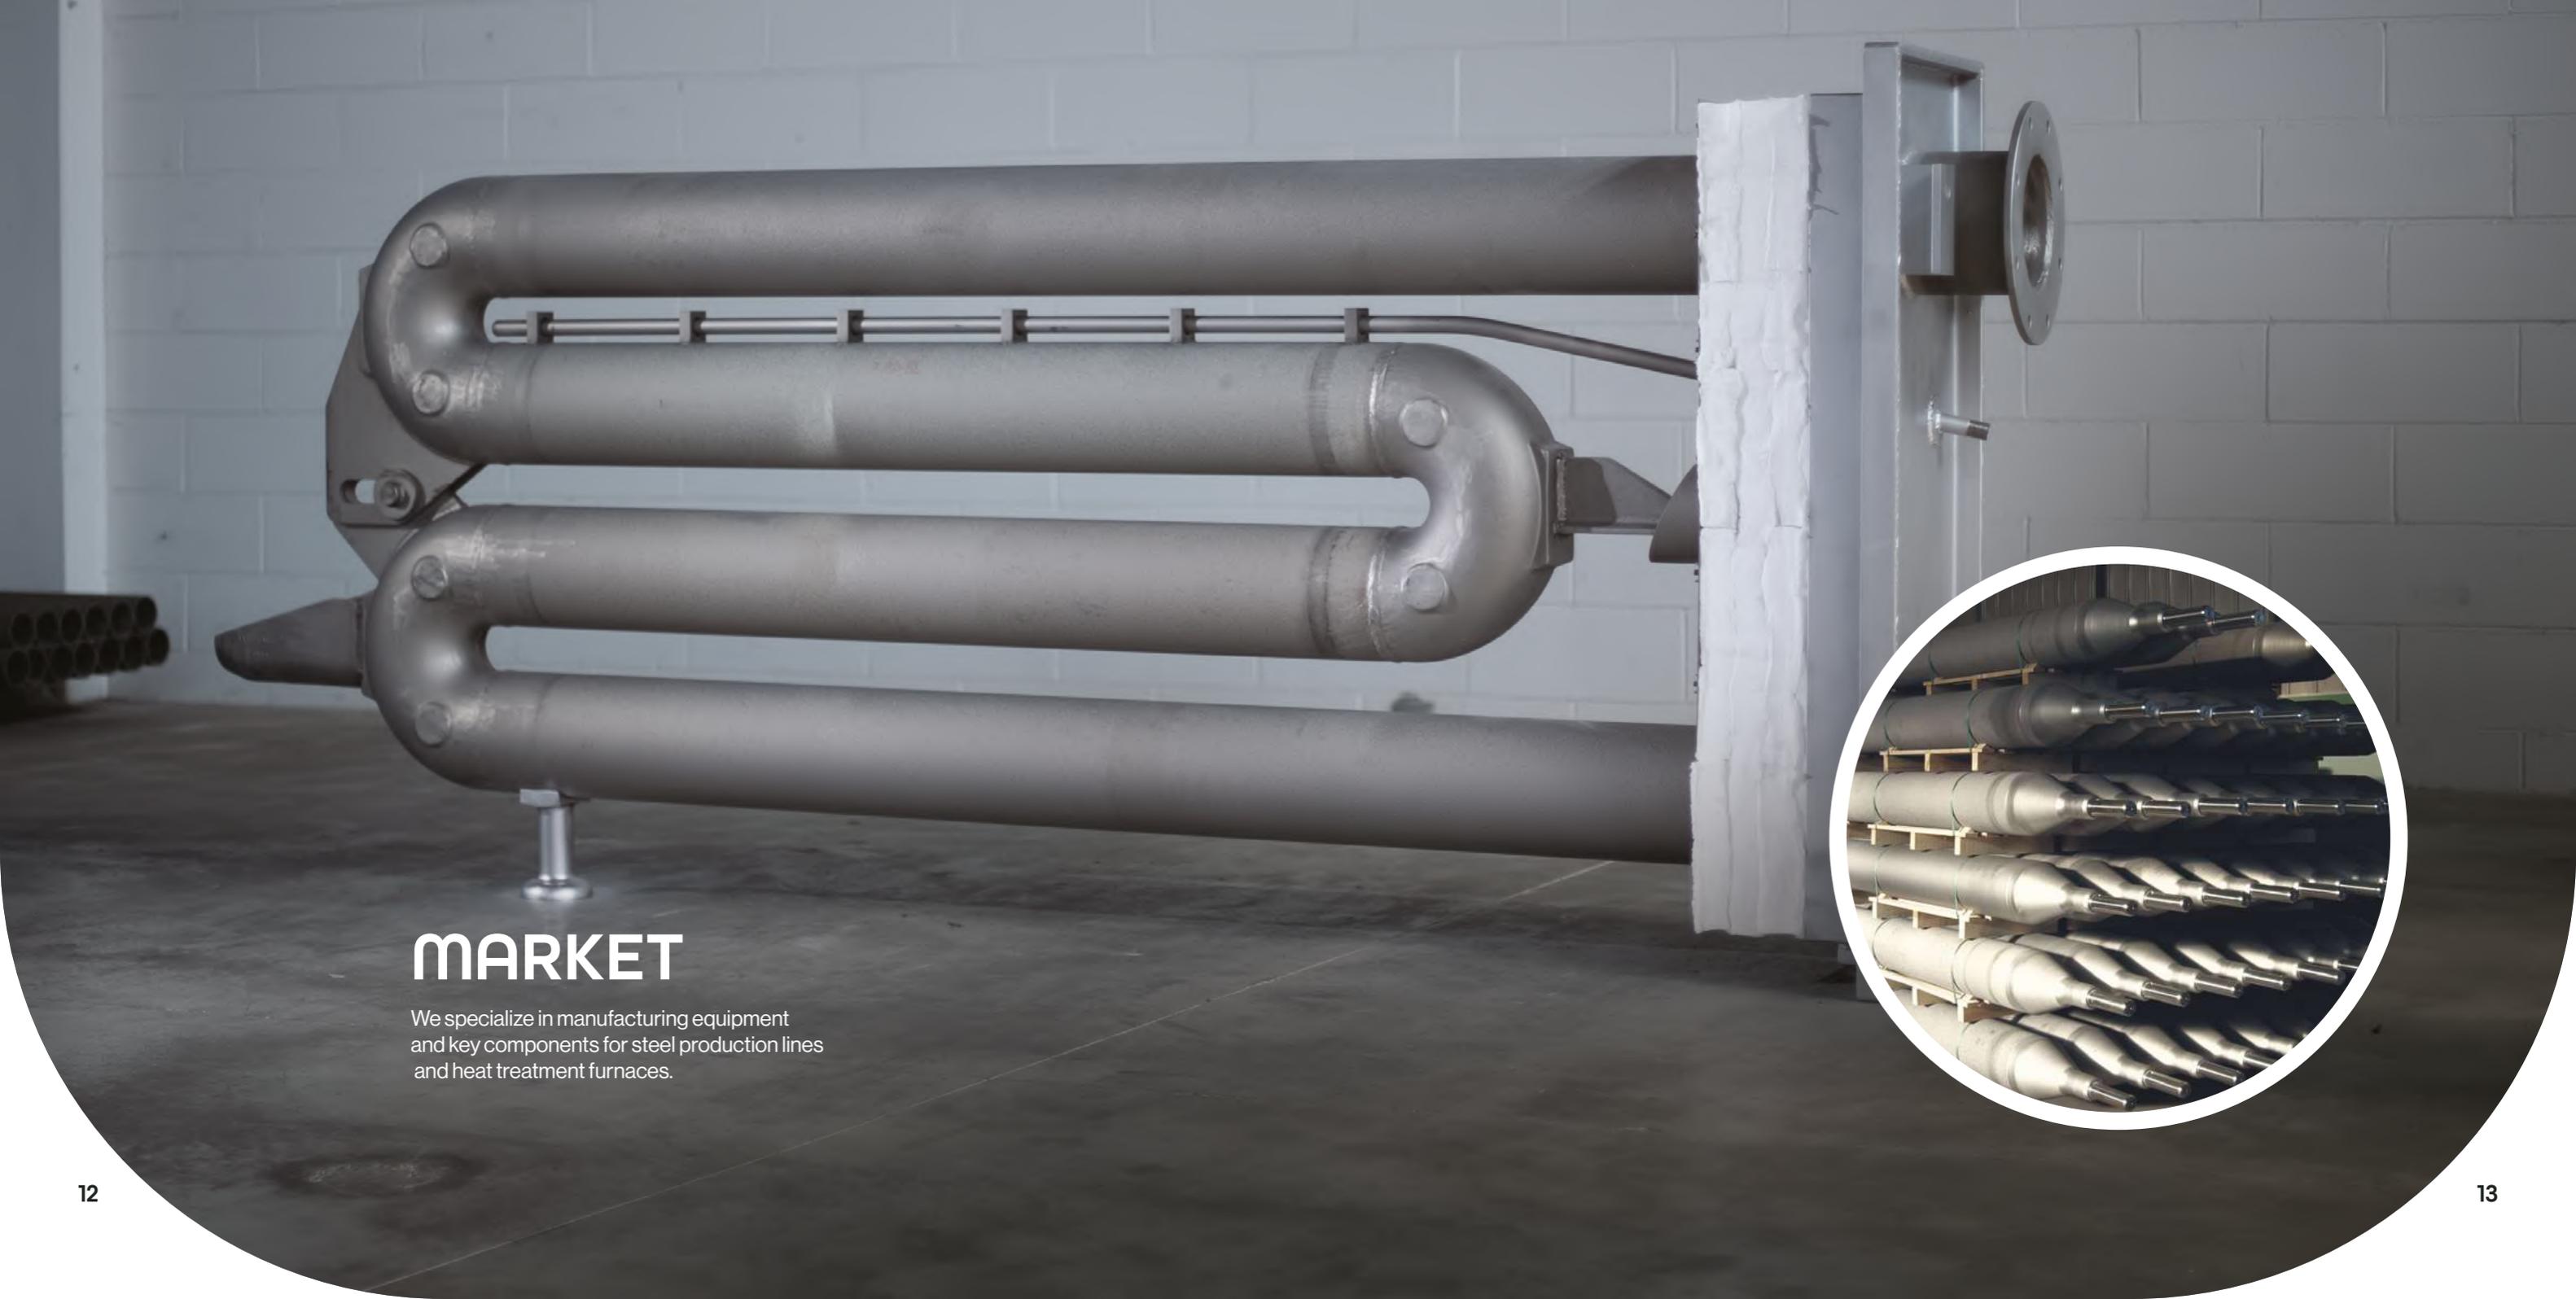

SPECIAL STEEL FOUNDRIES

With two production sites, a static casting foundry in green sand and a centrifuged cone and tube foundry, we offer a wide range of products for the iron and steel industry and the heat treatment of steels and non-ferrous alloys.

MECHANICAL WORKSHOP

In our mechanical workshop, we have a machining shop and a welding shop. We can manufacture complex high-quality products, and we can also make repairing and revamping of existing equipment.

MARKET

We specialize in manufacturing equipment and key components for steel production lines and heat treatment furnaces.

MARKET

We specialize in manufacturing equipment and key components for steel production lines and heat treatment furnaces.

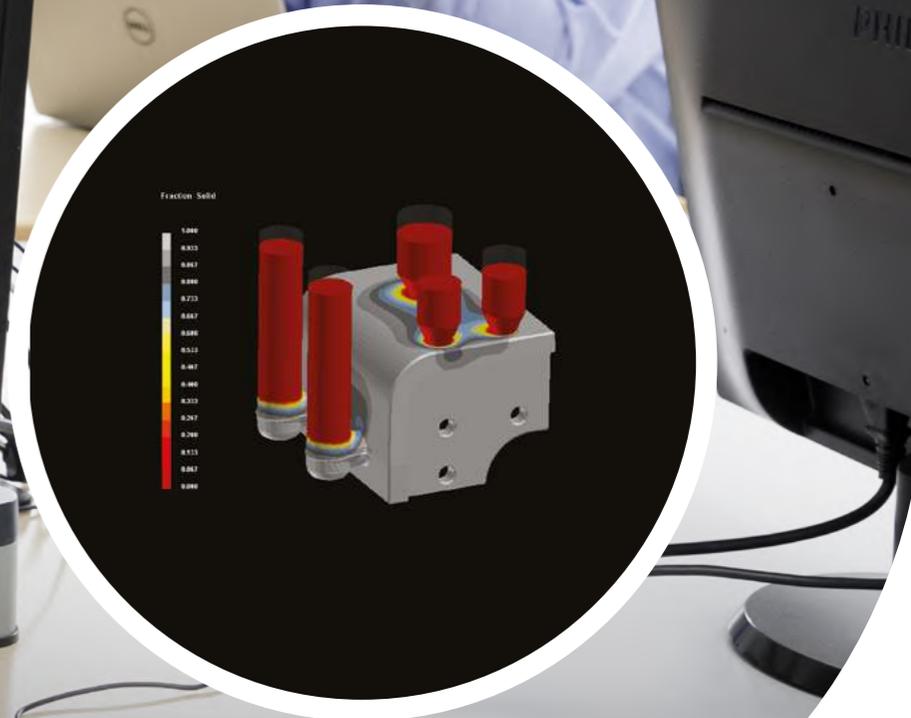

QUALITY CONTROL

We put the utmost care in the quality control of every single step of our production process.

TECHNICAL CONSULTANCY

Our long-standing experience and knowledge of processes and products in the steel industry, and the use of the most advanced tools allow us to meet the needs of our customers and their unique projects.
